Swine Flu Report

BETA TESTING OR REAL WORLD PANDEMIC?

SWINE FLU FACTS AND FICTIONS
WHAT ADDS UP.. WHAT DOESN'T

THE GOOD-LIFE GOOD-HEALTH SERIES

Written by the author of CANCER-STEP OUTSIDE THE BOX:

TY BOLLINGER
Fear, panic, and terror are largely caused by ignorance. Folks, once a topic is completely understood, I submit there is much less anxiety and much less fear. That is the purpose of this special report – to educate you on the “swine flu” (aka H1N1) and its related vaccine so that you can make wise decisions and avoid the “panic” that is sweeping the globe. Let me emphasize that the root word of “pandemic” is the word “panic.”

**Man Made?**

According to the CDC, the “swine flu” virus has gene segments from North American swine, bird, and human flu strains and a segment from Eurasian swine flu. Top scientists have confirmed that it is virtually impossible for any natural virus to consist of strains from many parts of the world and suddenly infecting people in one particular area. The only logical conclusion is that this was an engineered bio-release.

It is likely that a strain of influenza was engineered at the US Army laboratories in Fort Detrick, Maryland. This flu was then weaponized and released in downtown Mexico City. Yes, that’s right, in March 2009 the Frederick News Post reported Army criminal investigators believe that disease samples were missing from bio-labs at Fort Detrick.

If Fort Detrick rings a bell, that’s because it’s now a proven fact that the anthrax release after the 9/11 “terrorist” attacks also originated at Fort Detrick. Unfortunately, Bruce Ivins (the military scientist who was going to be implicated in the affair and also a devout Catholic) apparently decided to commit suicide before the FBI could charge him with the crime. Is it just me, or does this sound “fishy” to you? Does it remind you of what happened to Gary Webb after his article in the San Jose Mercury News relating to the Nicaraguan Contras, the CIA, “Freeway Rick,” and drug trafficking?

Anyway, back to the swine flu. Investigative journalist Wayne Madsen reported that “a top scientist for the United Nations, who has examined the outbreak of the deadly Ebola virus in Africa, as well as HIV/AIDS victims, and concluded that H1N1 possesses certain transmission ‘vectors’ that suggest that the new flu strain has been genetically-manufactured as a military biological warfare weapon. The UN expert believes that Ebola, HIV/AIDS, and the current A-H1N1 swine flu virus are biological warfare agents.”
“Pandemic” Profiteering

In my opinion, Big Pharma (along with the “controlled” mainstream media and many duplicitous governmental health officials acting as their own private mass marketing squad) is attempting to perpetrate one of the biggest profiteering schemes in the history of civilization. This man made “pandemic” is all about the money that can be generated from the vaccine and the subsequent illnesses caused by the vaccine.

In a September 2009 article entitled “Big Pharma Jumps Back into Flu Business,” Reuters reported that the US government “has committed $1.8 billion to companies to make a swine flu vaccine.” In recent months, Dr. Joseph Mercola has demonstrated that swine flu vaccine manufacturers could easily profit as much as $50 BILLION from this “pandemic.”

According to Barbara Fisher, president of the NVIC (National Vaccine Information Center), “We are witnessing a roll-out of the largest, most expensive mass vaccination campaign in the history of our nation. A rollout that is bigger than even the polio vaccine campaigns of the 1950’s.”

Remember 1976?

In 1976, when the US government directed mass vaccination of the entire country after the death of one soldier at Fort Dix, more people died from the swine flu vaccine than swine flu! Starting from a single, infected military recruit, the threat of a global “pandemic” and imminent death turned into a full-scale media and government circus.

After the soldier died, the CDC reported to the nation (and to the entire globe via the “controlled media”) that US citizens were in danger of facing a swine flu pandemic that could kill untold millions of Americans. They mobilized and began purchasing massive mega doses of swine flu vaccine to inoculate each and every American, if possible. There was a media “blitz” to brainwash Americans that their only hope of survival was to take the swine flu jab.

What exactly happened? Well, apart from the single soldier, no one else died from the “swine flu” in 1976. However, the US mass vaccinated millions of people anyway, causing death and paralysis to untold thousands. In the end, 25 people died from the vaccine and hundreds more who were vaccinated developed the crippling Guillain-Barré Syndrome immediately after their injections. Within a few months, claims totaling $1.3 billion had been filed by victims who had suffered paralysis from the swine flu vaccine.

This result of this 1976 fiasco was that the US government criminals successfully funneled
hundreds of millions of dollars straight into the pockets of their “Big Pharma buddies,” who eventually secured legislation to protect them from future liability via the Swine Flu Act of 1976.

**Some Shocking Statistics**

According to the CDC, on average 5% to 20% of the total US population (*approximately 308 million*) gets the flu each year. Of those folks, over 200,000 people are hospitalized from seasonal flu-related complications, and about 36,000 people die from seasonal flu-related causes. According to the FluTracker website, as of the end of November 2009, there were just over 8,000 fatalities from swine flu in the ENTIRE WORLD (*approximate population 6.798 BILLION*). You can see that we are NOT dealing with an out-of-control crisis here. Not even close...

Are you ready for some more unsettling information? According to an investigative report by CBS News, the severity of H1N1 cases has been drastically overestimated. The CBS News report revealed that the number and severity of swine flu cases is being manipulated by the “panic reports” from the CDC, NIH, and FDA. This is being assisted by the US government as a scare tactic to force people (*through fear*) to get an untested, dangerous, and possibly lethal vaccine. As I will demonstrate below, the H1N1 vaccine is comprised of toxic ingredients such that can damage the immune system, spread the swine flu, cause cancer and other disease, and even kill the vaccine “victim.”

**Death by Vaccine**

Studies also show flu vaccines do not work, and especially with children. On May 19, 2009, researchers at the International Conference of the American Thoracic Society in San Diego presented a study that found children who received the trivalent inactivated influenza vaccine (TIV) had a three times greater risk of hospitalization for the flu than kids who were not vaccinated.

Researchers at the Mayo Clinic conducted a study of 263 children with laboratory-confirmed influenza and reviewed records to determine which kids had been vaccinated with the flu shot prior to the illness and hospitalization. **What they found is shocking.** Not only did the vaccine not prevent the flu, but those children who received it **got sicker than those who did not**

In light of these facts, is it possible for there to be a “chain reaction” that would be falsely attributed to this man made swine flu pandemic, and could result in mandatory vaccinations, while in reality being **CAUSED BY THE VACCINE?** I submit that this is not beyond the realm of possibility. Using live attenuated viruses from infected monkey and other mammalian organs, in addition to other toxic vaccine ingredients such as thimerosal (*mercury*) and squalene, this disturbing possibility could become reality.

You see, thimerosal and squalene (especially squalene) often create what is known as a “cytokine storm.” A cytokine storm is when the injected pathogens and adjuvants (compounds which intensify the body’s
immune response), create an over reaction of the cytokines (chemical messengers) in the immune system. The abundance of antibodies then overwhims healthy tissue with massive inflammation, beyond what would be a normal immune response. The reaction then becomes out of control, and the “feedback loop” ends up killing the patient. In other words, you get cooked in your own juices!

A rarely discussed downside of attenuated (live) viruses is virus shedding. Basically, for several weeks after being vaccinated, the vaccinated person sheds some of the viruses in stool, phlegm, or saliva. So, kissing a vaccinated person or being near one who is sneezing and coughing could be more hazardous than dealing with someone who has the swine flu itself! So those “good citizens” who get vaccinated could turn out to be more like “suicide bombers,” spreading viruses while dying slow deaths themselves!

**Natural Protection**

But you might ask, “How can I protect myself from the flu without vaccination?” Following these simple guidelines will keep your immune system in optimal working order so that you’re far less likely to get sick with swine flu or even the normal seasonal flu. First of all, be sure to take a good source of omega-3 fats, such as fish oil, cod liver oil, krill oil, flax oil, etc. I highly recommend natural antibiotics (such as oil of oregano and garlic) as well as colloidal silver.

Also, get plenty of vitamin D, either from natural sunlight or a good supplement. You should avoid processed foods and all sugar, as sugar compromises your immune system. Stay away from soda pop as it also compromises your immune system. You might also want to consider “Miracle Mineral Supplement” which has an excellent track record treating malaria, parasites, and is an amazing pathogen killer.

Lastly, and this is just my opinion, avoid hospitals and vaccines. Hospitals are prime breeding grounds for infections of all kinds, and could be one of the likeliest places you could be exposed to infectious diseases like the swine flu. Keep in mind that virtually all vaccinations will LOWER your immune system, NOT make it stronger!

**Pig$ in the Parlor**

In my opinion, the entire H1N1 “pandemic” is nothing more than a crafty plot to intimidate and control people and to sell vaccines. Big Pharma is reaping obscene profits as a result of the media fear mongering behind the swine flu outbreak, despite the fact that the H1N1 virus has killed far less people that the seasonal flu. As a matter of fact, this “pandemic” is much less deadly than prescription drugs, which kill over 26,000 people each year.

I think it’s safe to say that more damage will be done by the vaccines than the virus itself. The so-called “cure” for this man made biological attack is the method of delivery, so take vaccinations at your own risk. Take a rat (or your local politician) to the doctor with you to beta test the vaccination before you let them jab you. If you’ve studied history, you’ll remember that the Spanish Flu (which killed millions) was spread through a typhus vaccine during World War I.
